# PROLONG THE LIFE OF YOUR PARALLELING SWITCHGEAR WITH UPGRADES FROM KOHLER

For the last 100 years, Kohler has been creating reliable power products that have included many cutting-edge technological solutions. These advancements have enabled Kohler to become a leader in the global generator and paralleling switchgear market, and our knowledge and experience allow us to help keep your current system up-to-date. Rely on the experts at Kohler to retain your paralleling switchgear's optimal operation.

KOHLER® paralleling switchgear systems are designed to manage your power needs by carefully monitoring and adjusting the load between generators that have been installed to work in tandem. As switchgear technology continues to advance, Kohler leads the charge with product enhancements keeping your system current, so you have reliable power that can be easily serviced.

## BENEFITS OF A KOHLER UPGRADE

Kohler has eliminated the need to replace your entire switchgear lineup by offering an upgrade option that enhances your existing system and promotes its longevity.

- Our upgrades use the latest programmable logic control (PLC) and human interface (HMI)
- Replace your obsolete components before they fail to avoid extended system downtime with emergency rates for replacement
- Redundant PLC configurations with the ability to load the application from an SD card for shorter replacement if PLC should fail
- Upgraded system with a new PLC updated software for a more efficient and robust operation allows for acceleration of troubleshooting should the need arise

## THE RIGHT CHOICE

Avoid weeks of downtime due to the unforeseen failure of an obsolete part with KOHLER paralleling switchgear field service, which offers the most comprehensive engineered upgrade solutions for your aging KOHLER switchgear. Our upgrade option offers a one-year warranty on all components replaced with the option to extend it to a two-year warranty.

## UPGRADE OPTION INCLUDES

- Verification of communications and mapping
- Verification of system sequences and load sharing
- Ability to change modes or sequencing
- Operator training by Kohler Service Specialist

## ADVANTAGES

- Redundant PLC ability
- SD card application loading
- Spare PLC site stocking
- Kohler Service Specialist experts focused on reducing downtime throughout the upgrade process

## THERE'S NO NEED TO WAIT

Start your upgrade today! We encourage our customers to be proactive. Upgrading your system in a controlled and scheduled manner will be a good preventative measure and prove more economical than that of an emergency.
